EXPAC MOTION · PARTNER PORTAL

Vendor Profile & Portal Manual

Your shipments, tracking, quotes and rates

For ExPac's agents, transporters and destination partners: how to follow your ExPac shipments live, update milestones, reply to rate requests and keep your rates current.

WHAT'S INSIDE

Everything on your profile, in one place

1

Getting started

Your invite, signing in and the menu.

2

Dashboard

What's moving, what's arriving and what needs you.

3

Shipments

Every ExPac shipment assigned to you, in one grid.

4

Update a shipment

Booking details, milestones, delays and the POD.

5

Documents & messages

Upload your documents and talk to our ops team.

6

Live tracking

All your shipments on one map.

7

Quotes

Our Requests for Quote and your replies.

8

Rate sheets

Keep your rates and coverage up to date.

Sign in to your profile

1 Open your invite

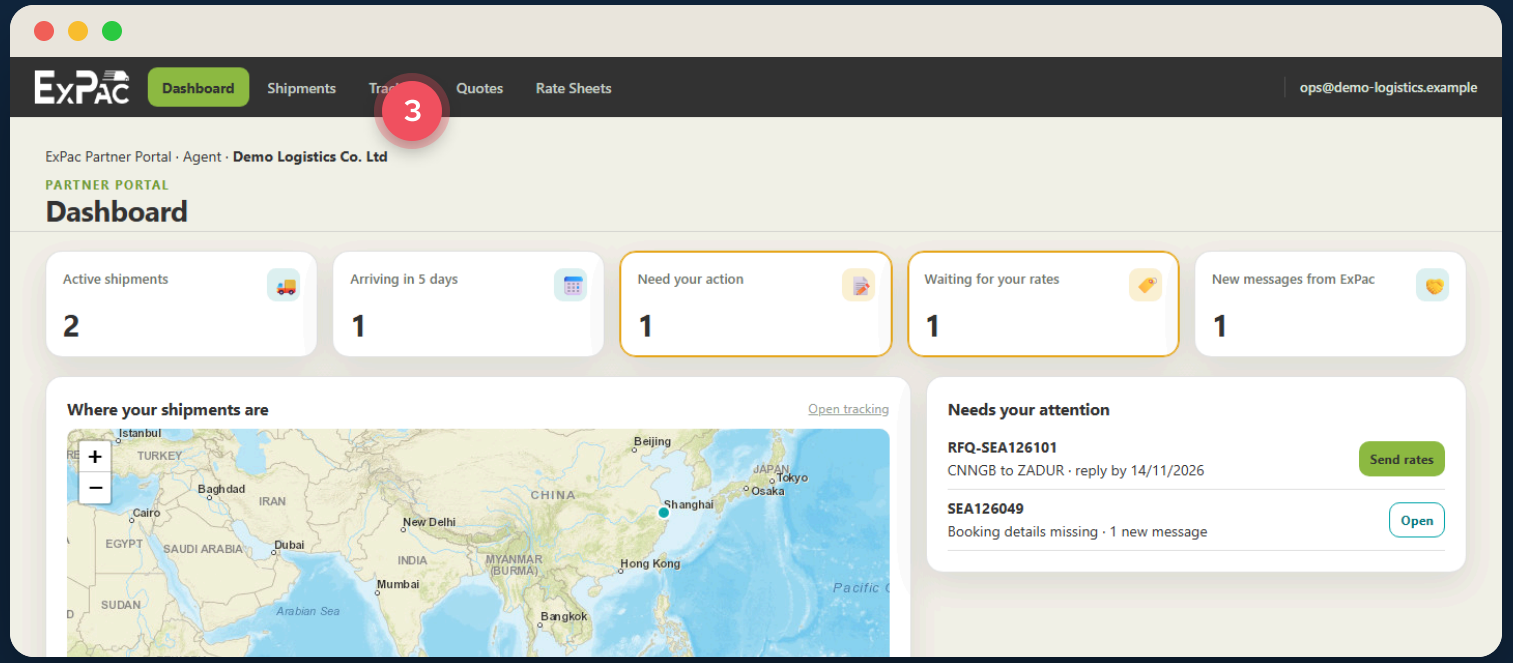

ExPac emails a "Create your partner login" link. Sign up with the same email address it was sent to.

2 Sign in at expac-motion.co.za

Any computer or phone, no app to install. Your profile opens on the Dashboard.

3 Use the top menu

Dashboard, Shipments, Tracking, Quotes and Rate Sheets. Your company and partner type show above each page.

One profile per company. Need a login for a colleague? Ask us and we'll send another invite.

2 · DASHBOARD

Your day at a glance

1 The counters

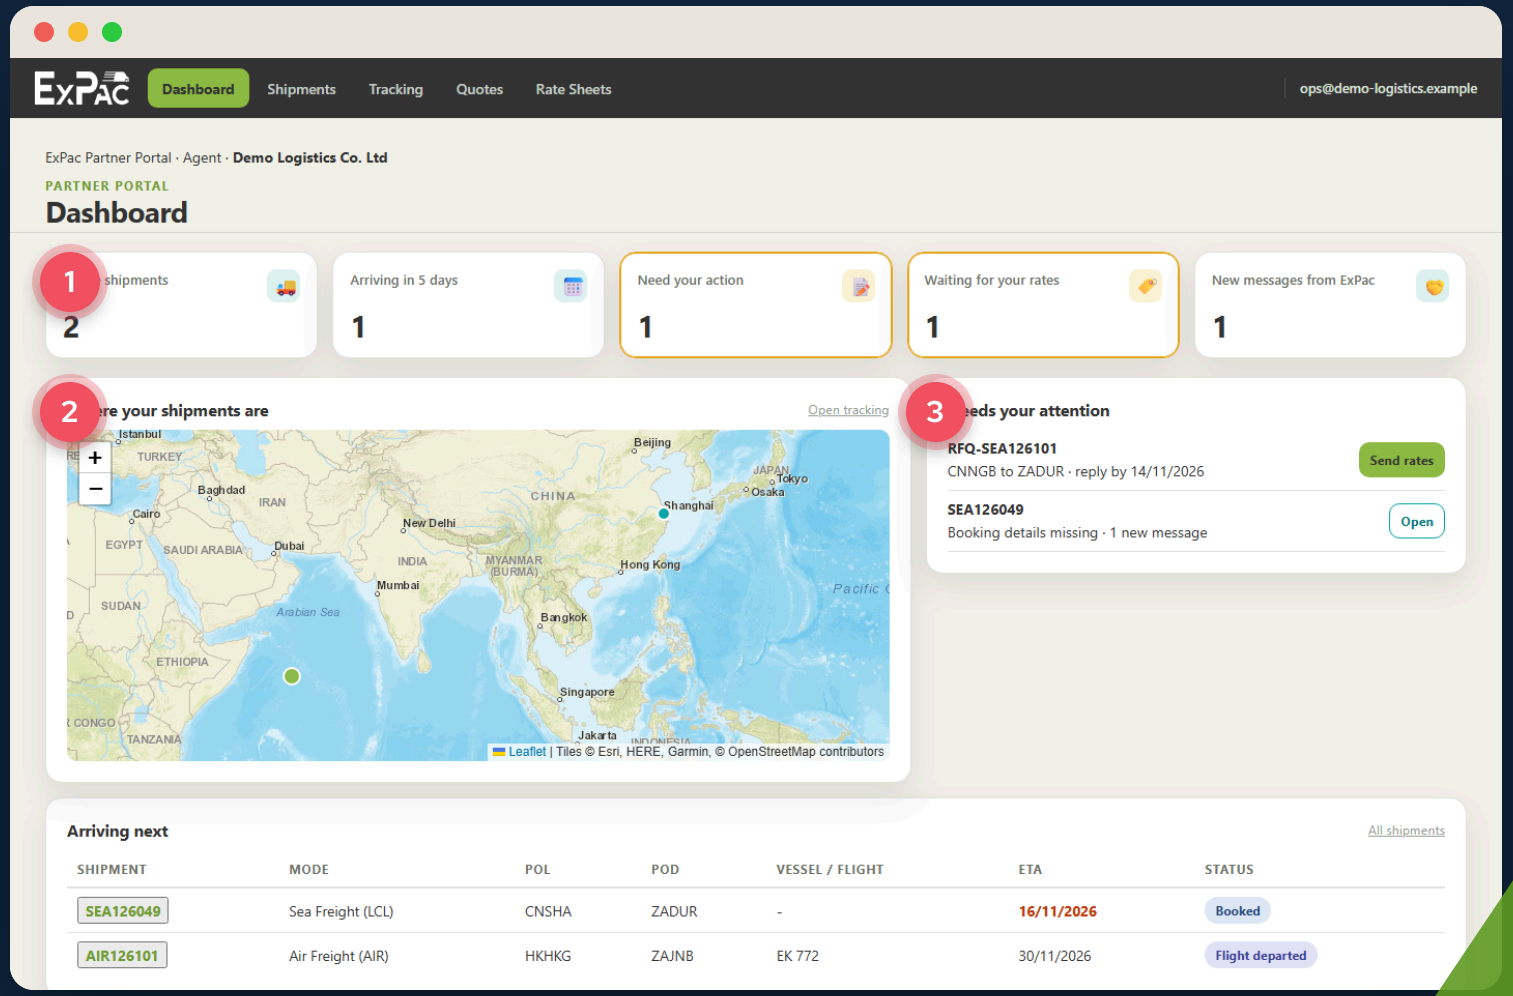

Active shipments, arriving in 5 days, needing your action, rate requests waiting and new messages. Click one to jump there.

2 Where your shipments are

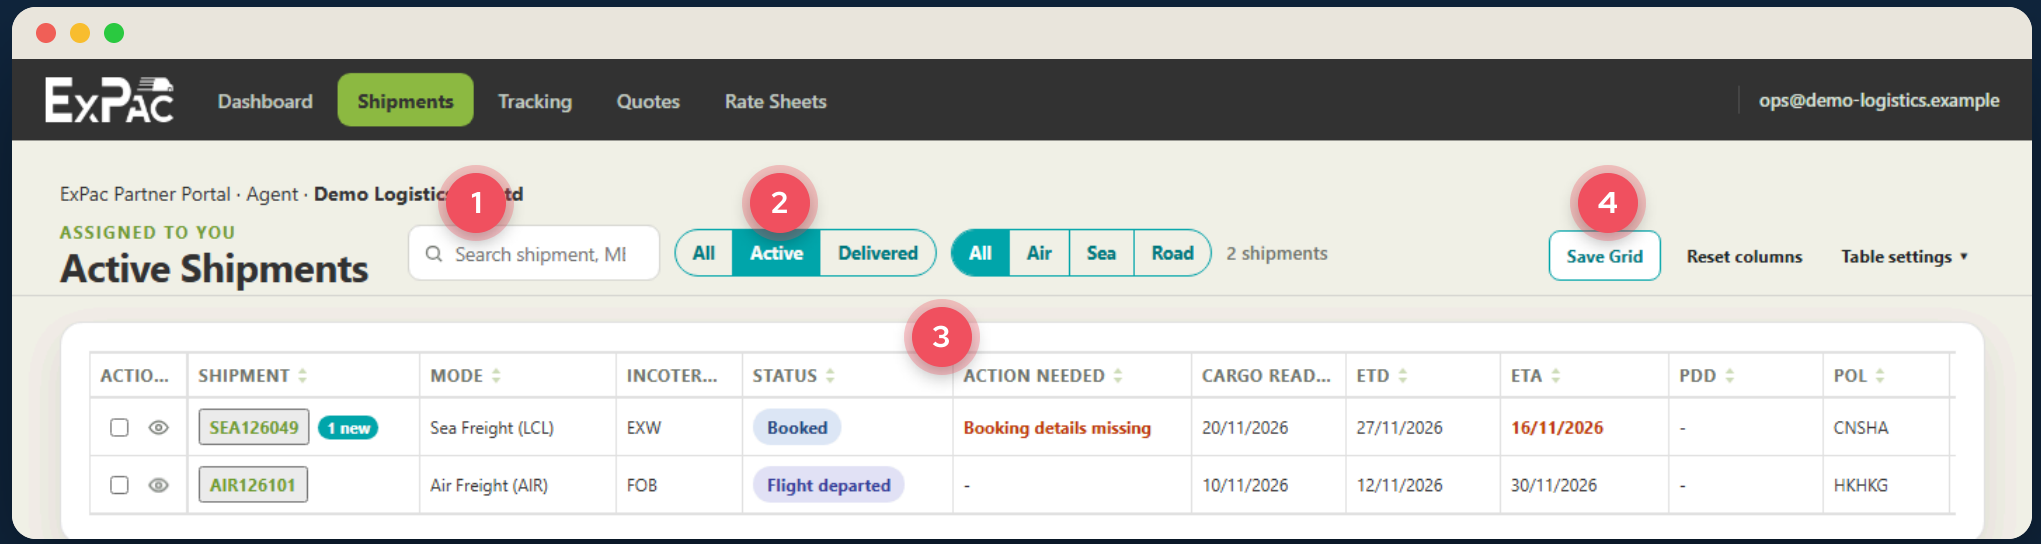

Green dot: live vessel or flight position. Teal dot: the port, until it's tracking.

3 Needs your attention

Rate requests to answer and shipments missing an update, with a button straight to each.

Every shipment assigned to you

1

Search

Shipment number, MBL / AWB, container or vessel.

2

Filter

Active, Delivered or All, and by Air, Sea or Road.

3

Action Needed

What ExPac is waiting for. A red ETA means arrival is 5 days away or less.

4

Your grid

Sort, resize and move columns, then Save Grid. Table settings shows or hides columns.

4 · UPDATE A SHIPMENT

Open a shipment

1 **Shipment details**

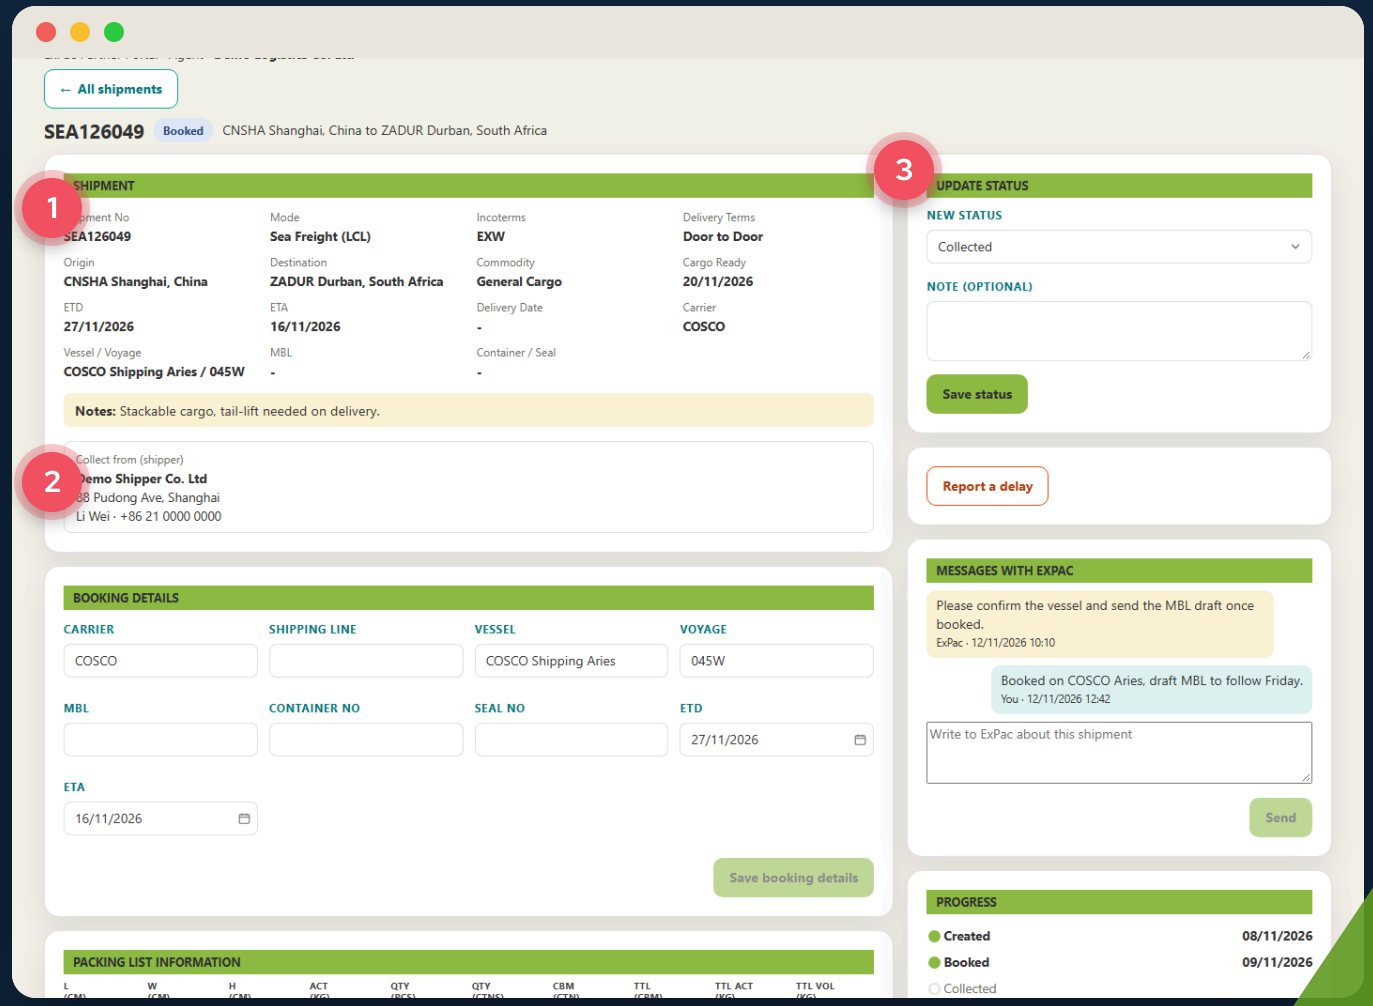

Mode, incoterm, delivery terms, route, dates, carrier and container. Only your leg: no customer details or selling prices.

2 **Collect from / Deliver to**

Agents see the shipper and pickup address; delivering partners see the delivery address and site contact.

3 **Update status**

Pick the next milestone, add a note and save. ExPac and the timeline update straight away.

Which milestones you update

PARTNER	YOU SET	YOU FILL IN
Origin agent	Booked, Collected, Received (CFS / airline), Loaded, Departed	Booking details: carrier, shipping line, vessel or flight, voyage, MBL / MAWB, container and seal, ETD and ETA
Transporter	Collected, Out for delivery, Delivered	Who signed for it and the delivery date, then upload the signed POD
Destination agent	Arrived, Discharged, Out for delivery, Delivered	Arrival notification and POD
Clearing agent	Entry lodged, Query raised, Customs cleared (Customs Files)	Entry number, release note, customs entry, duty / VAT invoice

Running late? Use **Report a delay** on the shipment: say what happened and give the new ETA or delivery date. ExPac gets it as a priority task.

4 · UPDATE A SHIPMENT

Booking details (agents)

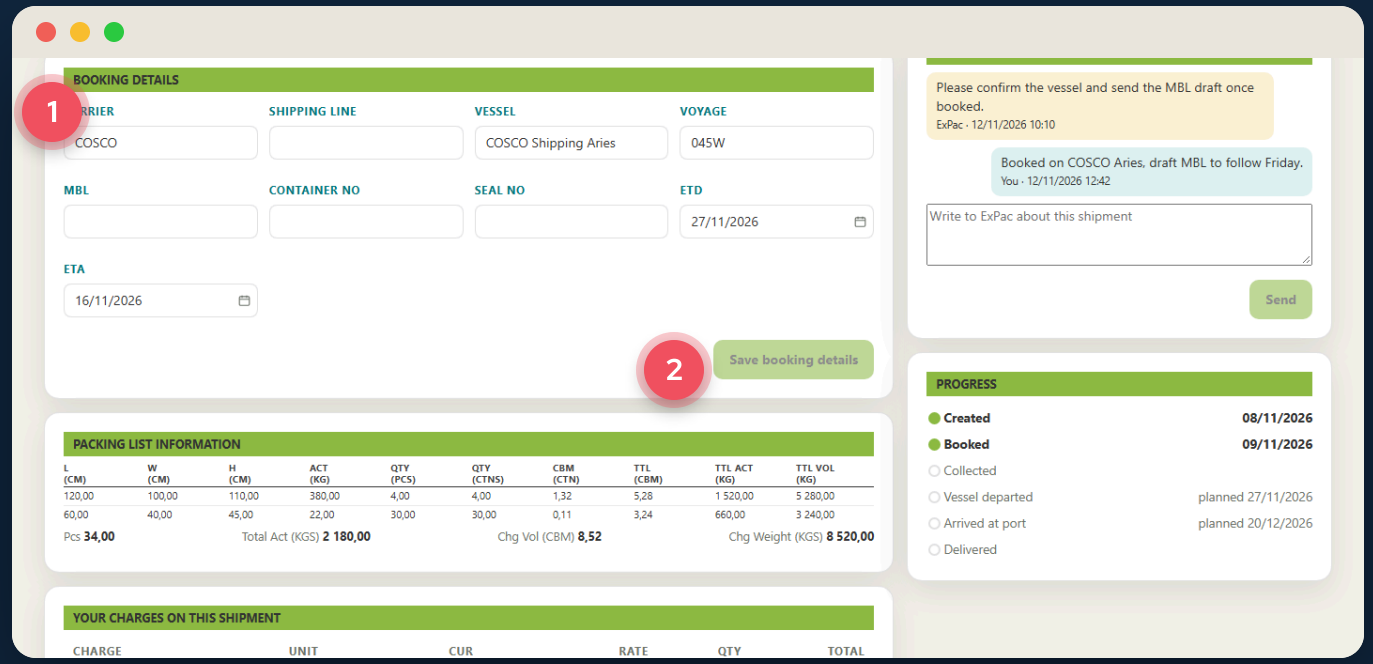

1 **Fill in what you have**

Carrier, vessel or flight, voyage, MBL / MAWB, container, seal, ETD, ETA. Dates are dd/mm/yyyy.

2 **Save booking details**

They go straight onto the ExPac shipment and its tracking. Every change is logged with your company name.

> **Tip:** the MBL / MAWB and container numbers start live tracking, so fill them in as soon as you have them.

5 · DOCUMENTS & MESSAGES

Your charges and documents

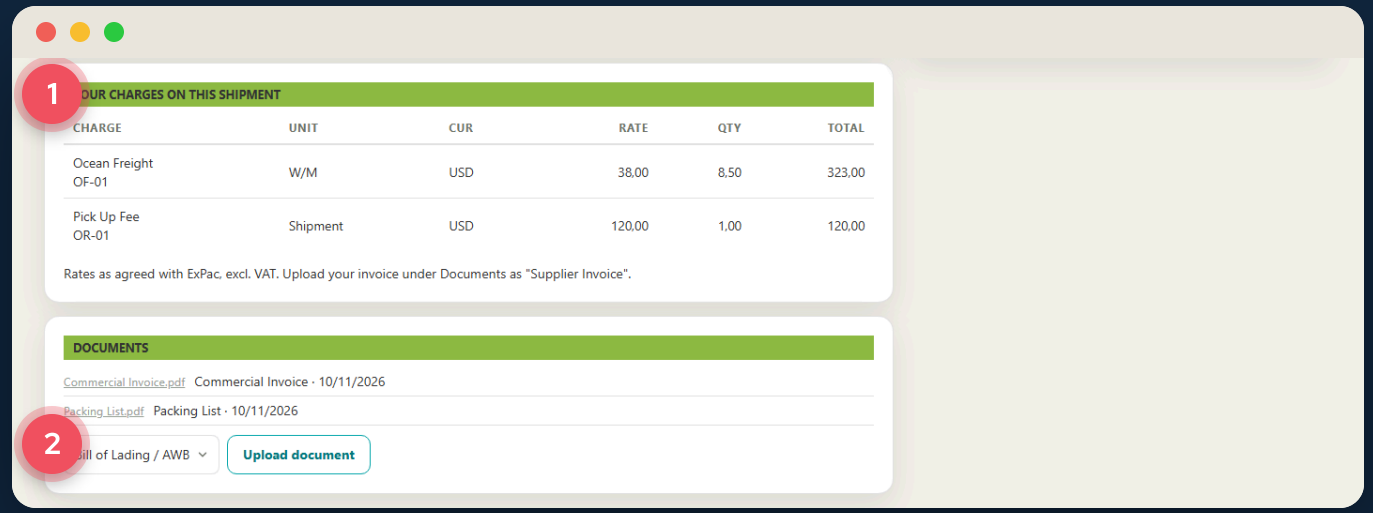

1 Your charges

The rates ExPac booked with you for this shipment, per charge, excl. VAT.

2 Upload a document

Pick the type (B/L or AWB, HBL, invoice, packing list, POD, delivery note, photos…) and choose the file. Upload your invoice as "Supplier Invoice".

Private by default. Your uploads go to ExPac only. Our team decides what the customer sees.

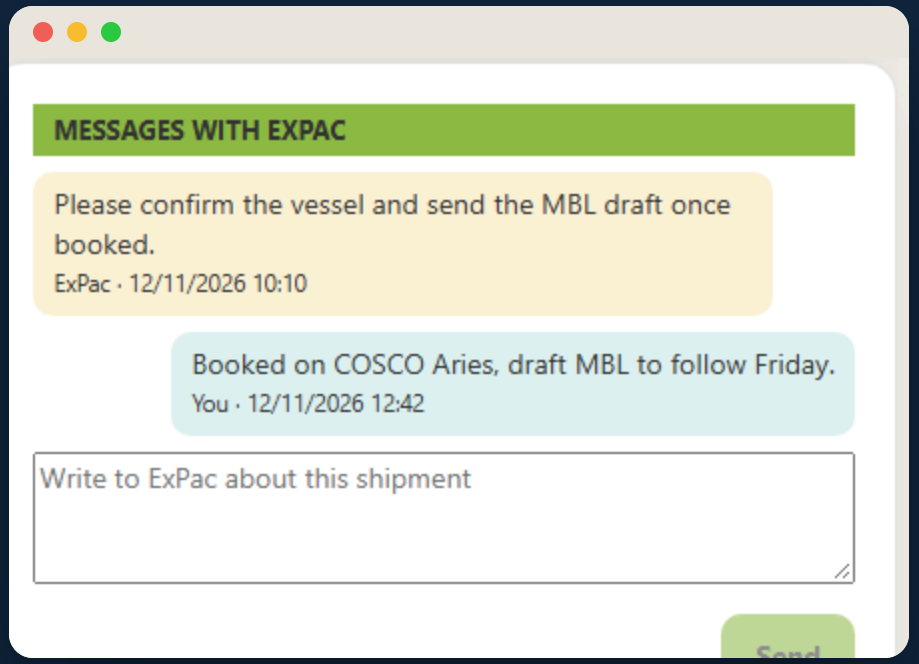

5 · DOCUMENTS & MESSAGES

Talk to our ops team

1. **Messages with ExPac**
   One thread per shipment. A "new" badge shows on the shipment when we've written to you.

2. **Document requests**
   When we need a document, we'll ask here (and by email). Upload it on the same shipment.

3. **Email alerts**
   We email you when a shipment is assigned to you and when ExPac changes its ETD, ETA or delivery date, all in one email.

6 · LIVE TRACKING

All your shipments on one map

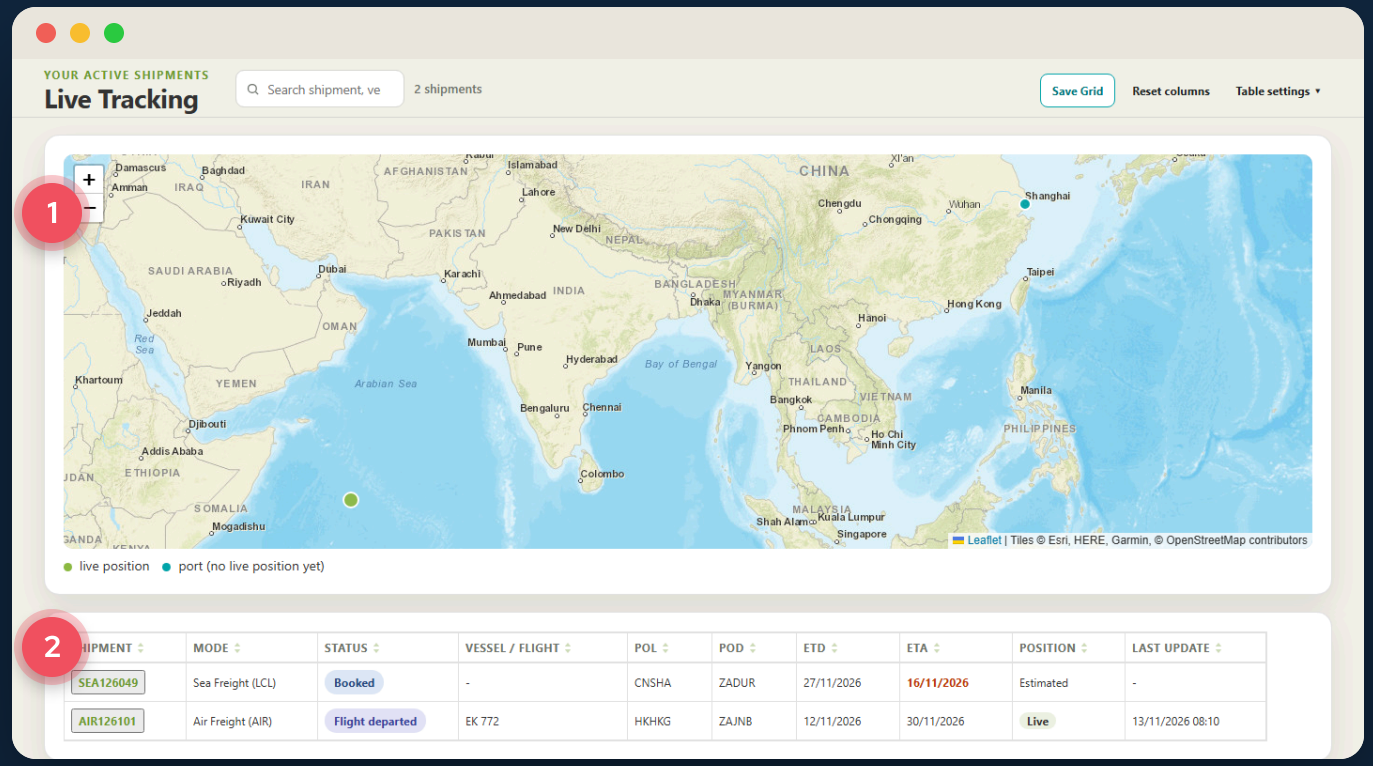

1 **The map**

Click a dot for the shipment, vessel or flight, status and ETA, then open it.

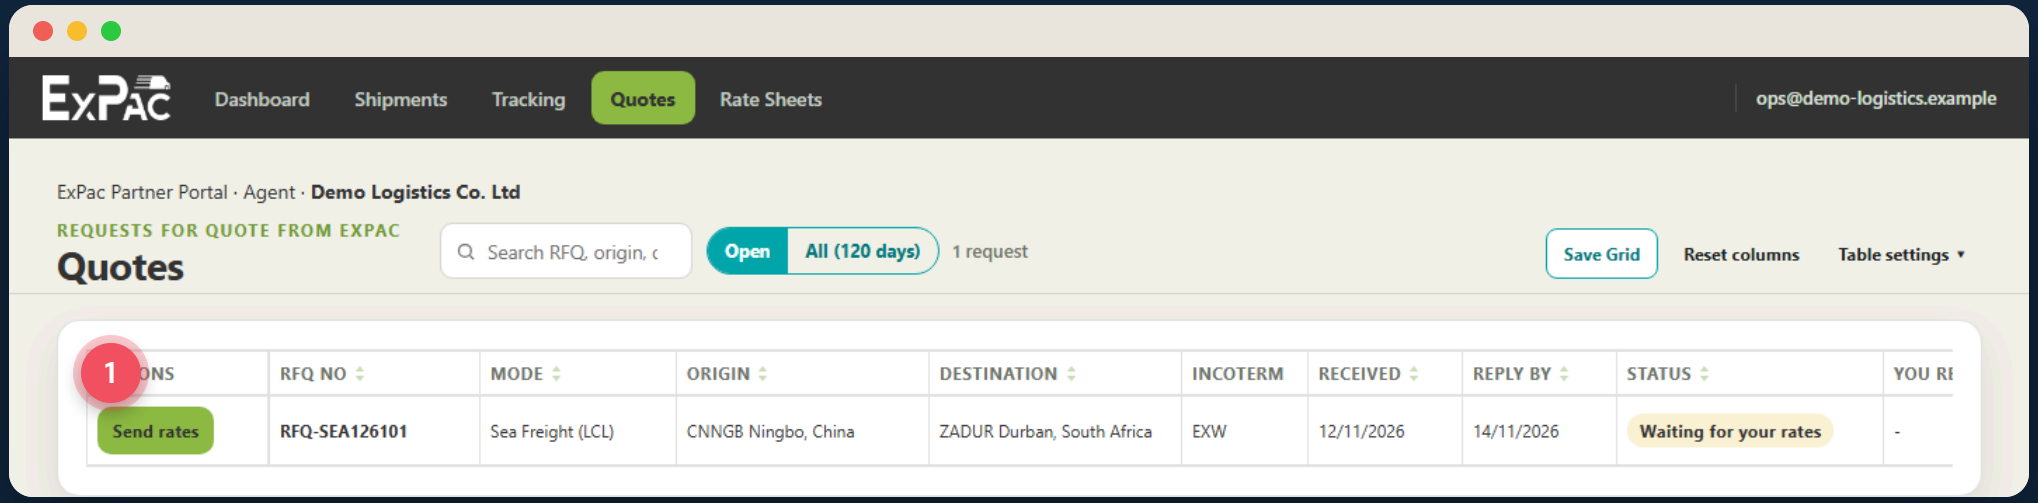

2 **The tracking grid**

Vessel or flight, ports, ETD, ETA, Live or Estimated position and when it last updated.

Not tracking yet? Add the MBL / MAWB or container number to the booking details and tracking starts automatically.

Our Requests for Quote

Waiting for your rates	ExPac asked for your rates. **Send rates** opens the reply form.
Rates sent, with ExPac	We have your reply. You can still edit it until we decide.
Your rates were used	We quoted our customer on your rates. Watch Shipments for the booking.
Reply overdue	Past the reply-by date (48 hours from the request). Send what you can.

7 · QUOTES

Send your rates

1 Check the shipment

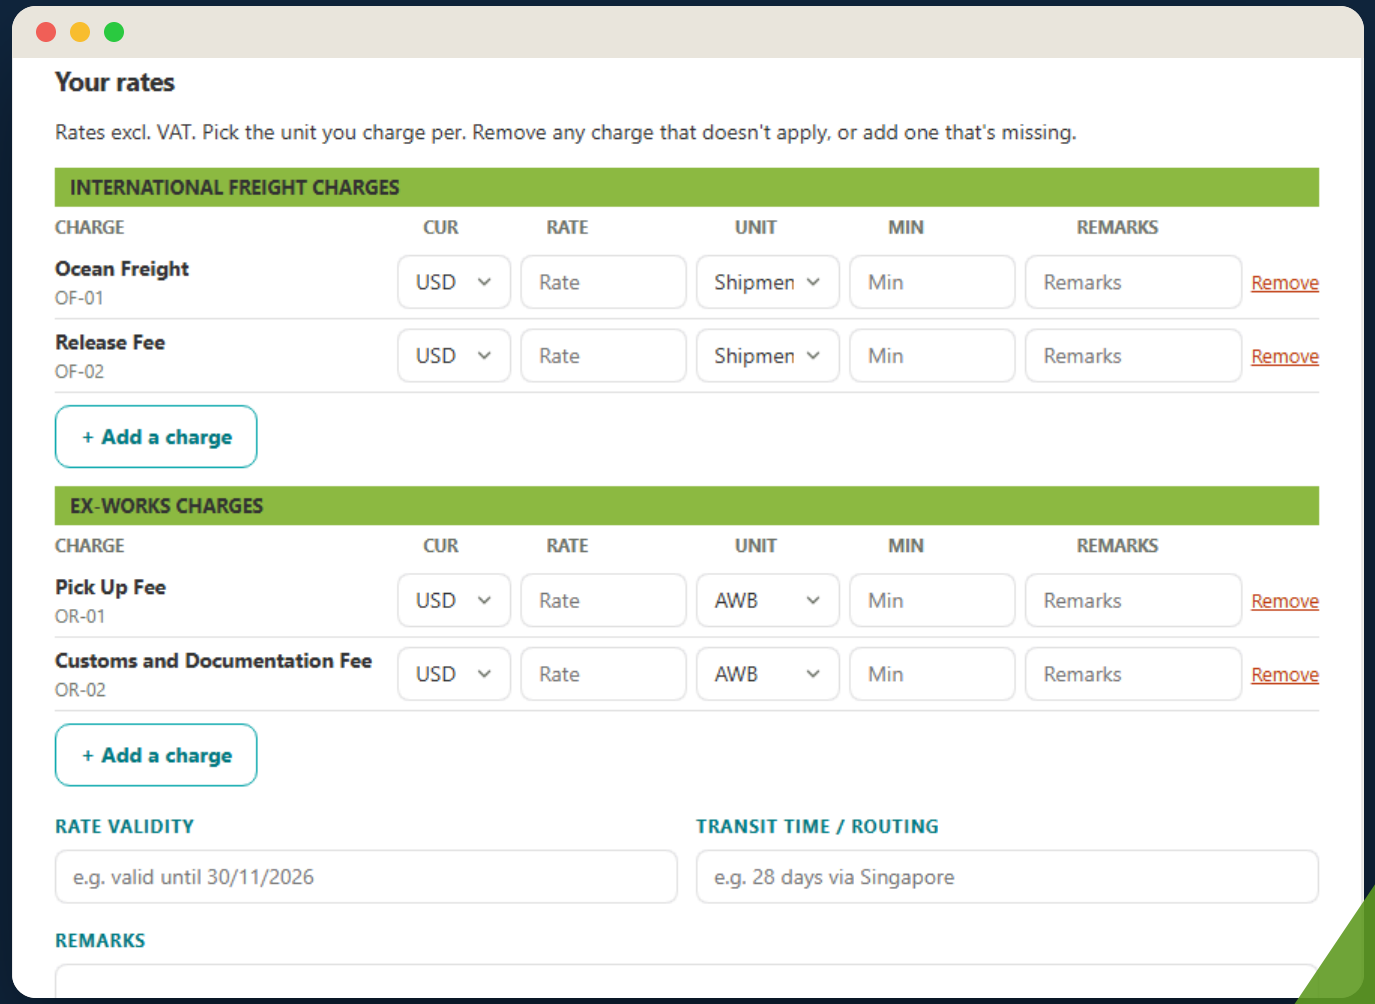

Mode, ports, incoterm, delivery terms, cargo ready date and the full packing list, as on the RFQ PDF.

2 Price each charge

Currency, rate, the unit you charge per (KG, CBM, W/M, AWB, container…) and any minimum. Remove what doesn't apply, add what's missing.

3 Validity & transit

Add rate validity, transit time or routing, then **Send rates to ExPac**. Can't quote? Tell us with one click.

8 · RATE SHEETS

Keep your rates and coverage current

1

One sheet per route

A rate sheet per mode and trade route, on ExPac's charge codes, in your currency. Add or update a sheet whenever your rates change, at least weekly.

2

Coverage

The modes, countries and ports you handle. We use it to send you the right Requests for Quote and shipments.

3

Every change counts

ExPac sees each update with its date. Sheets can be added and edited; ask us if one needs removing.

Why it matters: current rates on your sheets mean we can quote our customers on your rates straight away, without a new request each time.

QUICK ANSWERS

Good to know

Why don't I see a shipment?

Only shipments ExPac has assigned to your company show. Ask us if one is missing.

Can I see the customer or our selling price?

No. Your profile shows your leg of the shipment and your own rates only.

I entered a wrong date or number.

Save the correct one. Every change is logged, and the latest value counts.

Who sees my messages?

ExPac's ops team. Messages never go to the customer.

Can I delete an upload?

No, uploads are kept for the record. Upload the right file and message us to ignore the wrong one.

Too many emails?

Alerts are grouped: one email per round of changes, not one per change.

Thank you!

Let's keep the cargo moving, together.

Questions, another login for your team, or a walk-through of your profile: we're a message away.
