EXPAC MOTION · CUSTOMER PORTAL

Quote Request & Portal Manual

Request, approve and track, step by step

How to request a quotation online, ask for a revision, accept it, add your shippers and follow every shipment, live.

WHAT'S INSIDE

Everything you need, from quote to delivery

1

Getting started

Sign in and find your way around the dashboard.

2

Request a quote

Mode, route, cargo and addresses, in four steps.

3

Your quotations

Every quote in one list, with its status.

4

Ask for a revision

Tell us what to change, same quote number.

5

Accept or decline

One click books your shipment.

6

Add your shippers

Suppliers and their contacts, ready for bookings.

7

Track & trace

Timeline, live map and email updates.

8

Documents & chat

Upload, download and talk to our team.

1 · GETTING STARTED

Sign in to your portal

1 **Open expac-motion.co.za**

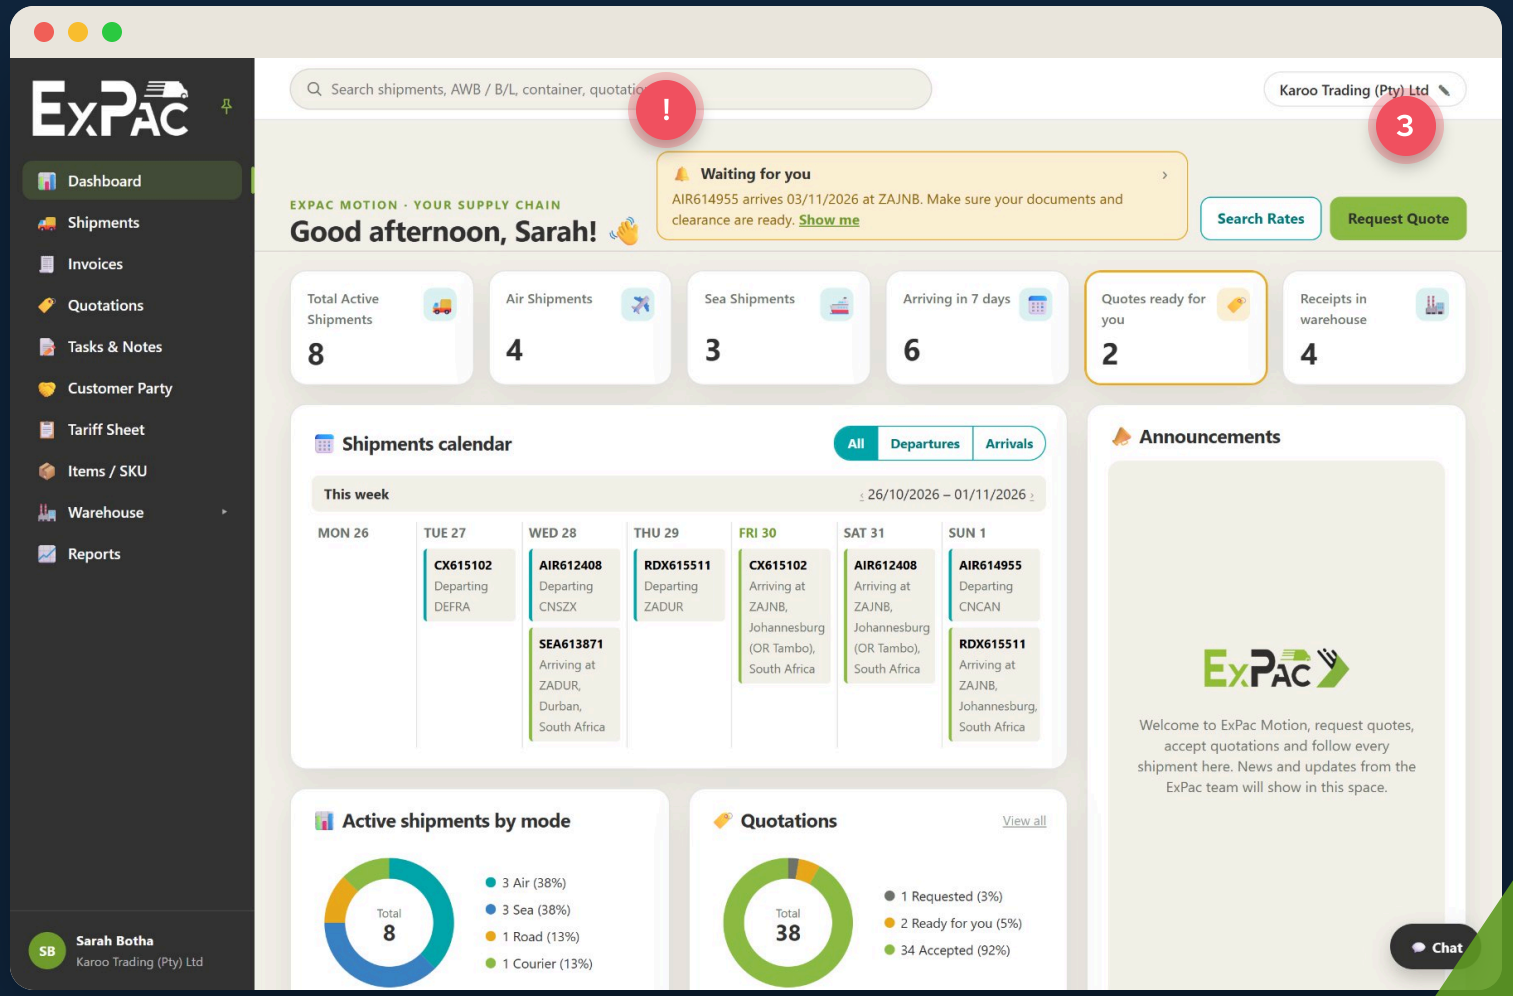

On a computer or phone, no app to install. Use the login link in your welcome email.

2 **Sign in**

With the email and password you set up from our invite. No login yet? Ask us, or request access on the sign-in page.

3 **Start from the dashboard**

Request Quote starts a new quotation; **Waiting for you** shows what needs your attention.

2 · REQUEST A QUOTE

Have these ready for an accurate price

Mode
Air, air consol, sea LCL or FCL, courier or road. Not sure? Pick the closest, we'll advise.

Route & terms
Origin and destination (city, port or airport) and the Incoterm, e.g. FOB or EXW.

Ready date
When the cargo can be collected from your supplier.

Goods value
Commercial value and currency, for insurance and duties.

Cargo
Pieces, cartons, size per carton (L × W × H cm) and weight per carton.

Addresses
Your supplier's collection address and the delivery address.

Your reference
Your PO or order number, so the quote and shipment carry it.

Special notes
Hazardous, stackable, container sizes (FCL), customs clearance needed.

Tip: add your supplier under **Customer Party** first (section 6), so their details are on file for the quote and the booking.

2 · REQUEST A QUOTE

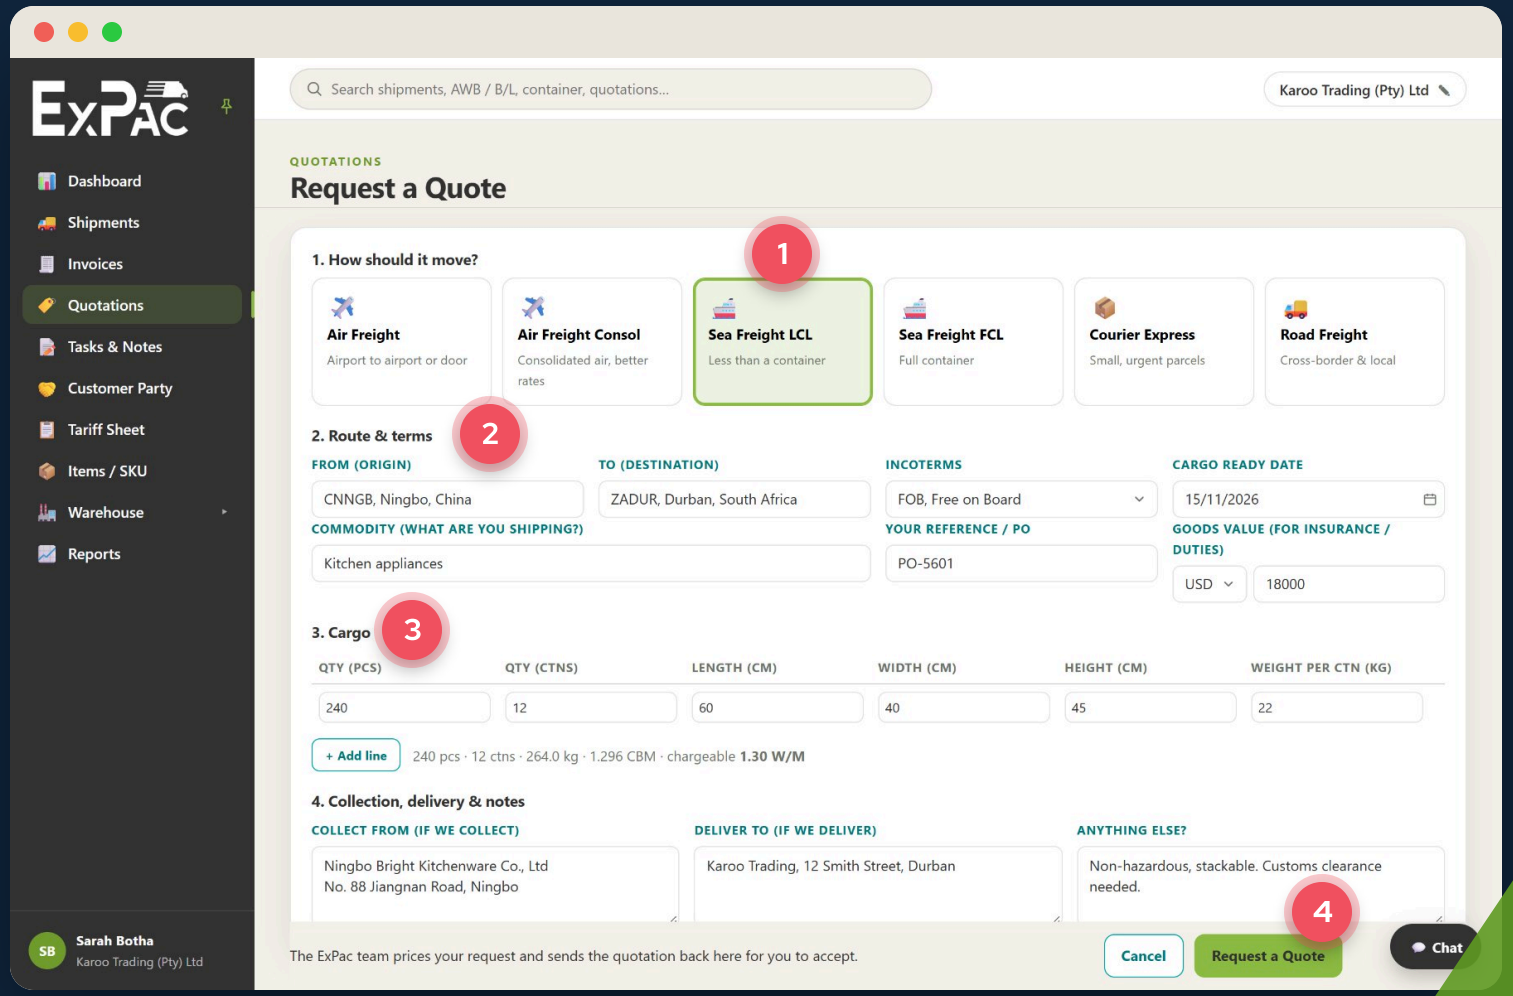

Request a quote in four steps

1. **How should it move?**
   Go to **Quotations** › **+ Request Quote** and pick the mode.

2. **Route & terms**
   Origin, destination, Incoterm, ready date, commodity, your PO and the goods value.

3. **Cargo**
   One line per carton size. **+ Add line** for more; the chargeable weight is worked out for you.

4. **Addresses & send**
   Collection and delivery addresses, any notes, then **Request a Quote**.

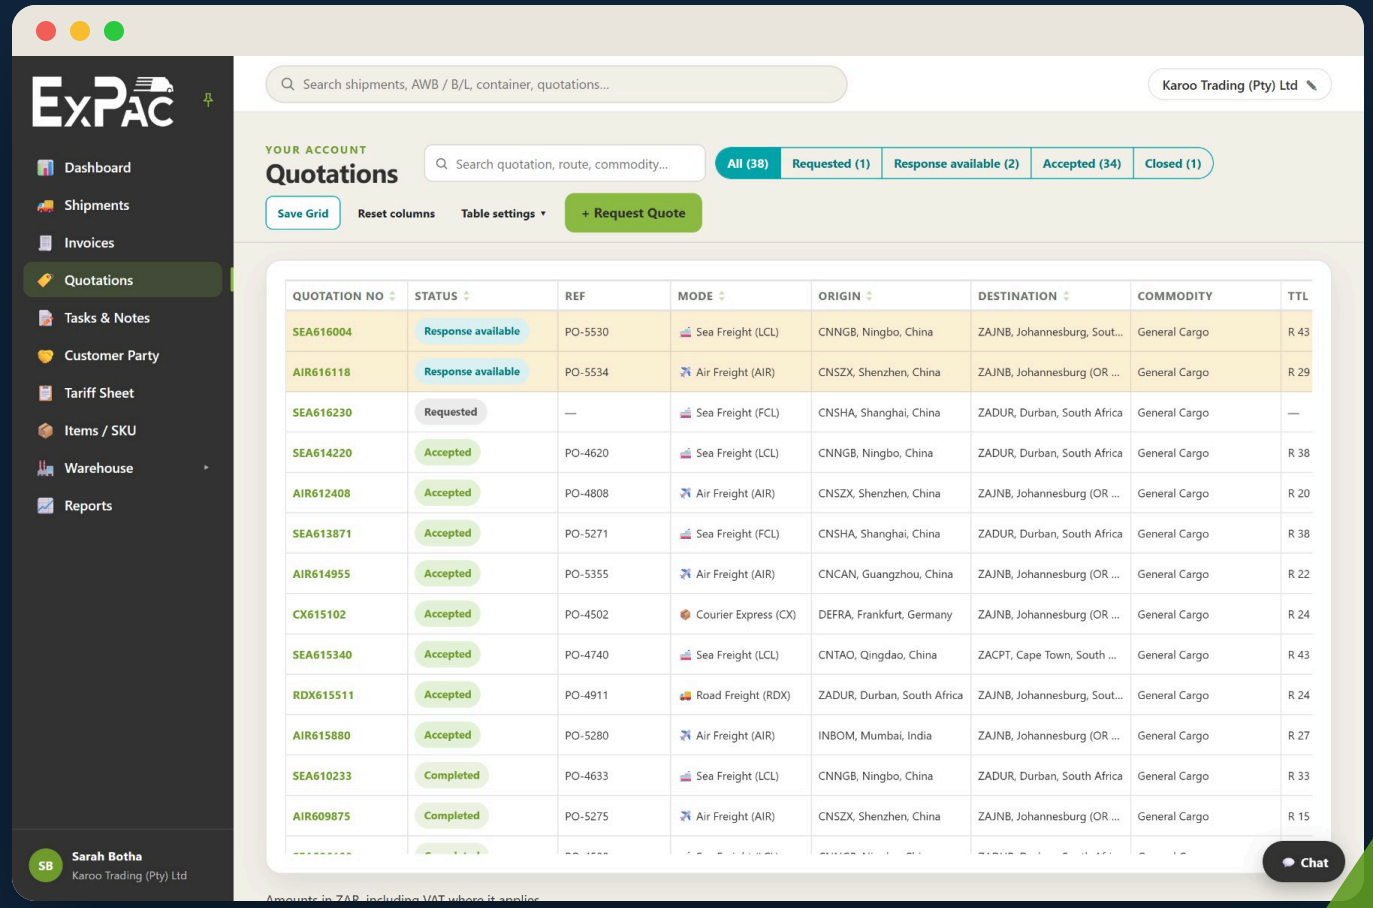

3 · YOUR QUOTATIONS

Every quotation, one list

Under **Quotations**. The ones waiting for your answer are highlighted at the top. Filter by status with the buttons above the list.

Requested	Received, our team is pricing it.
Revision requested	Your changes are with us.
Response available	Priced and ready: open it to accept, decline or revise.
Accepted	Booked, the shipment is under Shipments.
Closed	Declined or expired.

You'll get an email as soon as a quotation is ready, with a link straight to it.

3 · YOUR QUOTATIONS

Review the quotation

1 Open it

Click the quotation number: route, terms, packing list, every charge and the total incl. VAT.

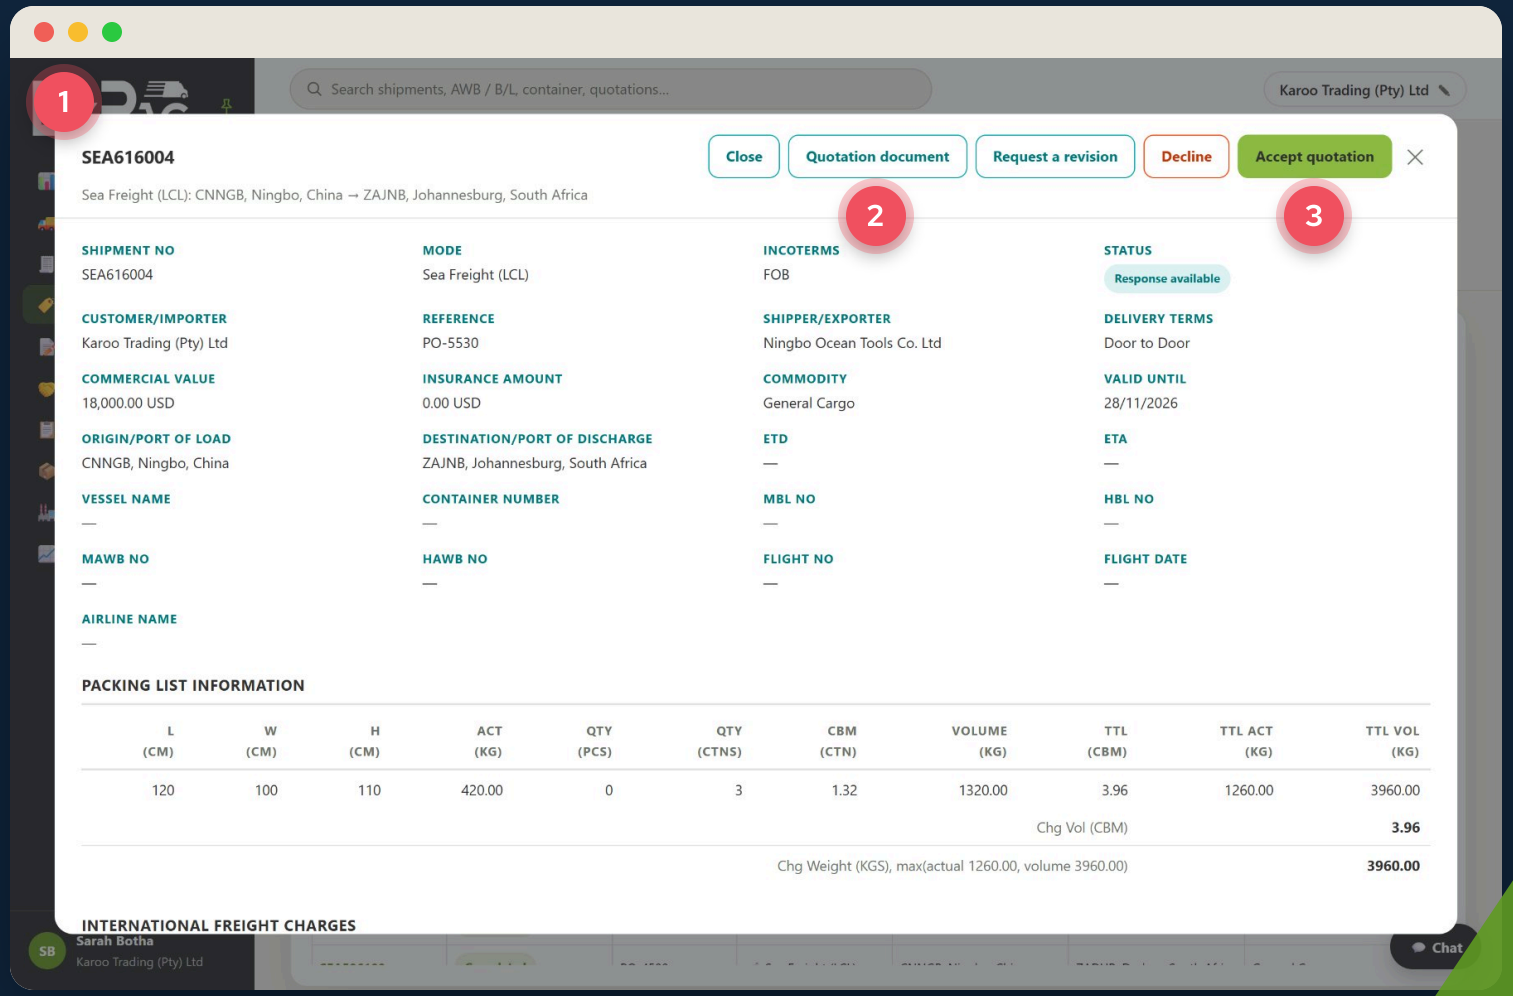

2 Download it

Quotation document gives you the PDF to share or file.

3 Decide

Accept, decline or request a revision, from the buttons at the top.

> **Check "Valid until".** Rates are held until that date; after it, ask for a revision to re-price.

4 · ASK FOR A REVISION

Need something changed?

1 **Request a revision**

On the open quotation, click **Request a revision**.

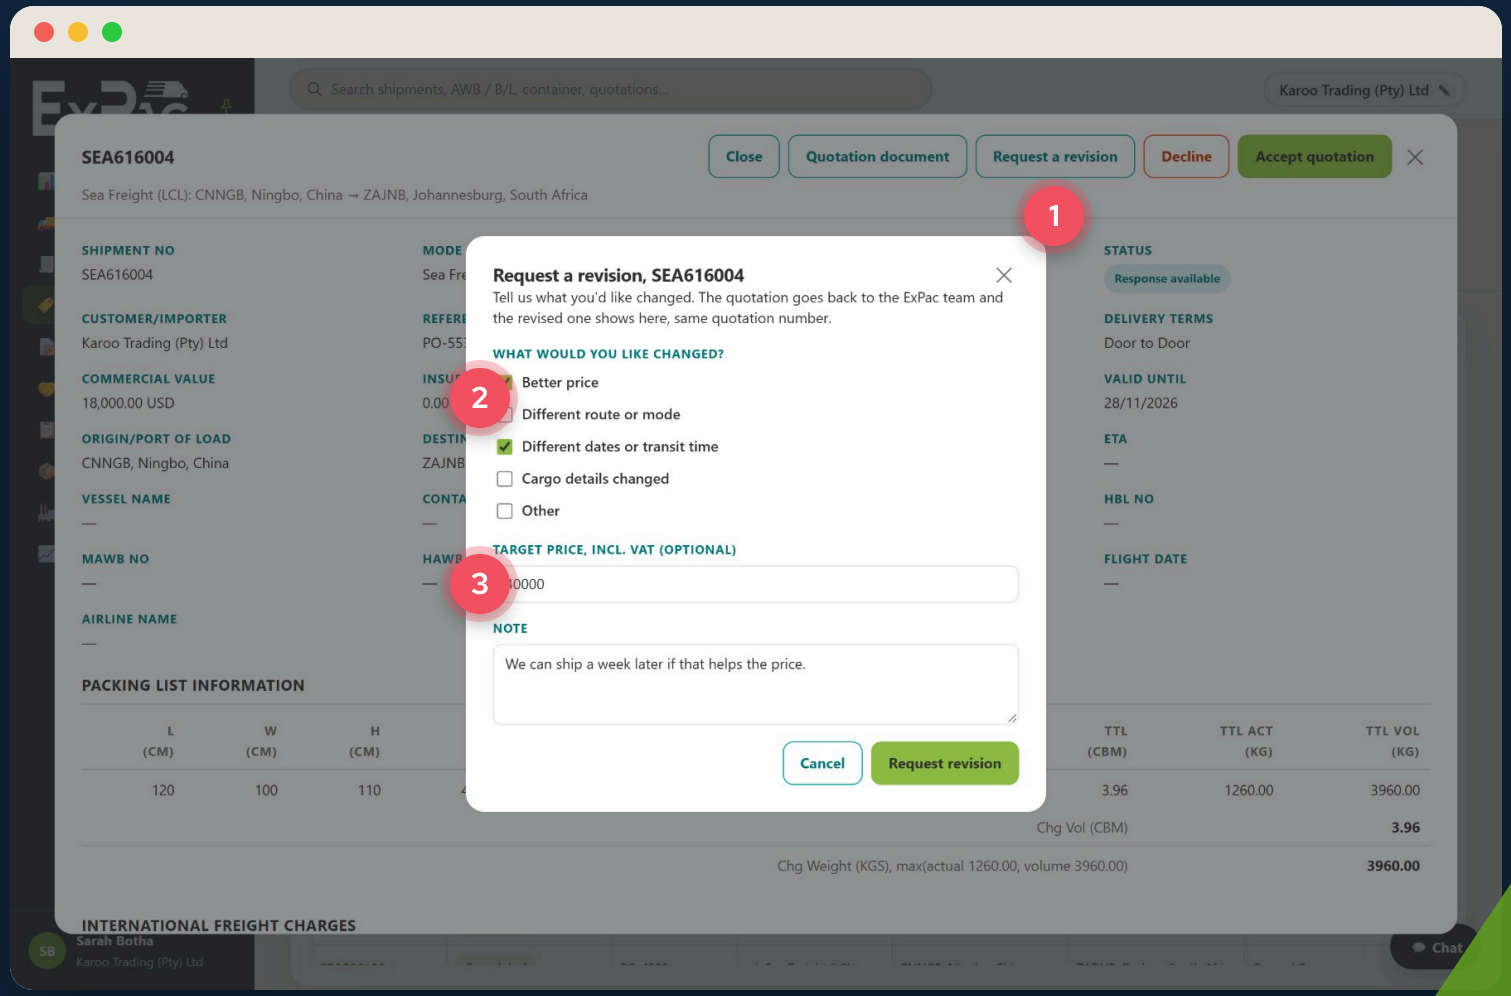

2 **Tick what to change**

Better price, route or mode, dates or transit time, cargo details, or other.

3 **Add a target and a note**

Optional target price incl. VAT, and anything that helps us, then **Request revision**.

Same quote number. The revised quotation comes back as "Revision 2" in the same place, and by email.

5 · ACCEPT OR DECLINE

Happy with it? Accept online

1 **Accept quotation**

Check the total and route in the confirmation, then accept. We book your shipment straight away.

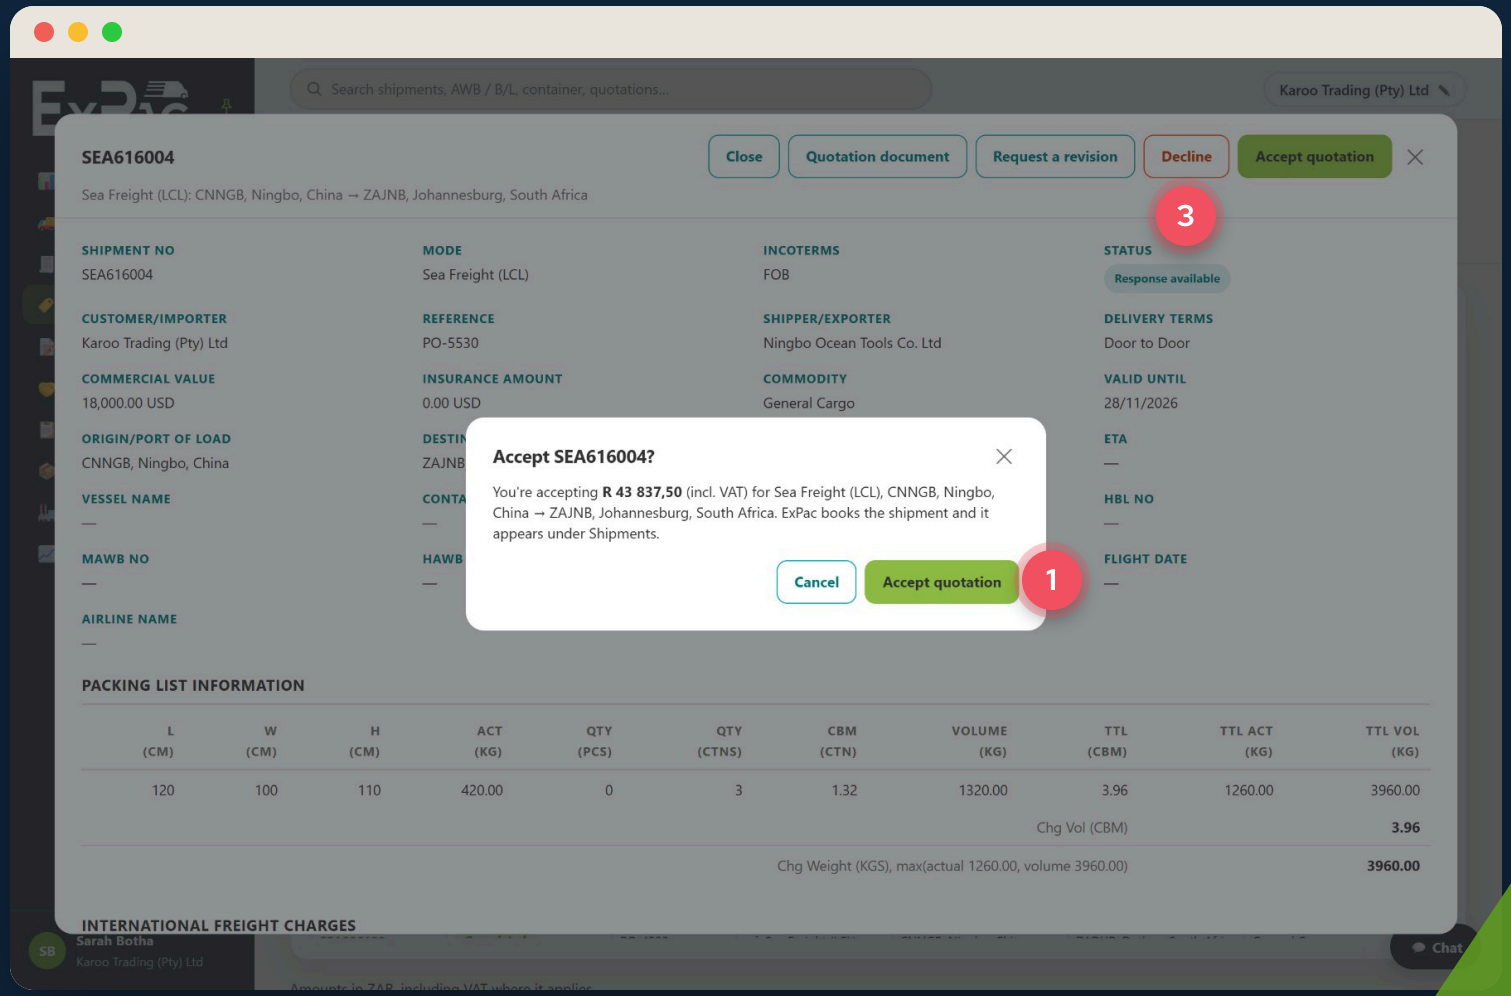

2 **Follow it under Shipments**

The accepted quote becomes a shipment with the same number, e.g. SEA616004.

3 **Not going ahead?**

Decline and, if you like, tell us why: price, timing, another option.

Changed your mind? A declined quotation that is still valid can be accepted after all, from the same screen.

6 · ADD YOUR SHIPPERS

Keep your suppliers on file

1 **Customer Party**

In the menu. Every shipper you've used is listed, with their shipments.

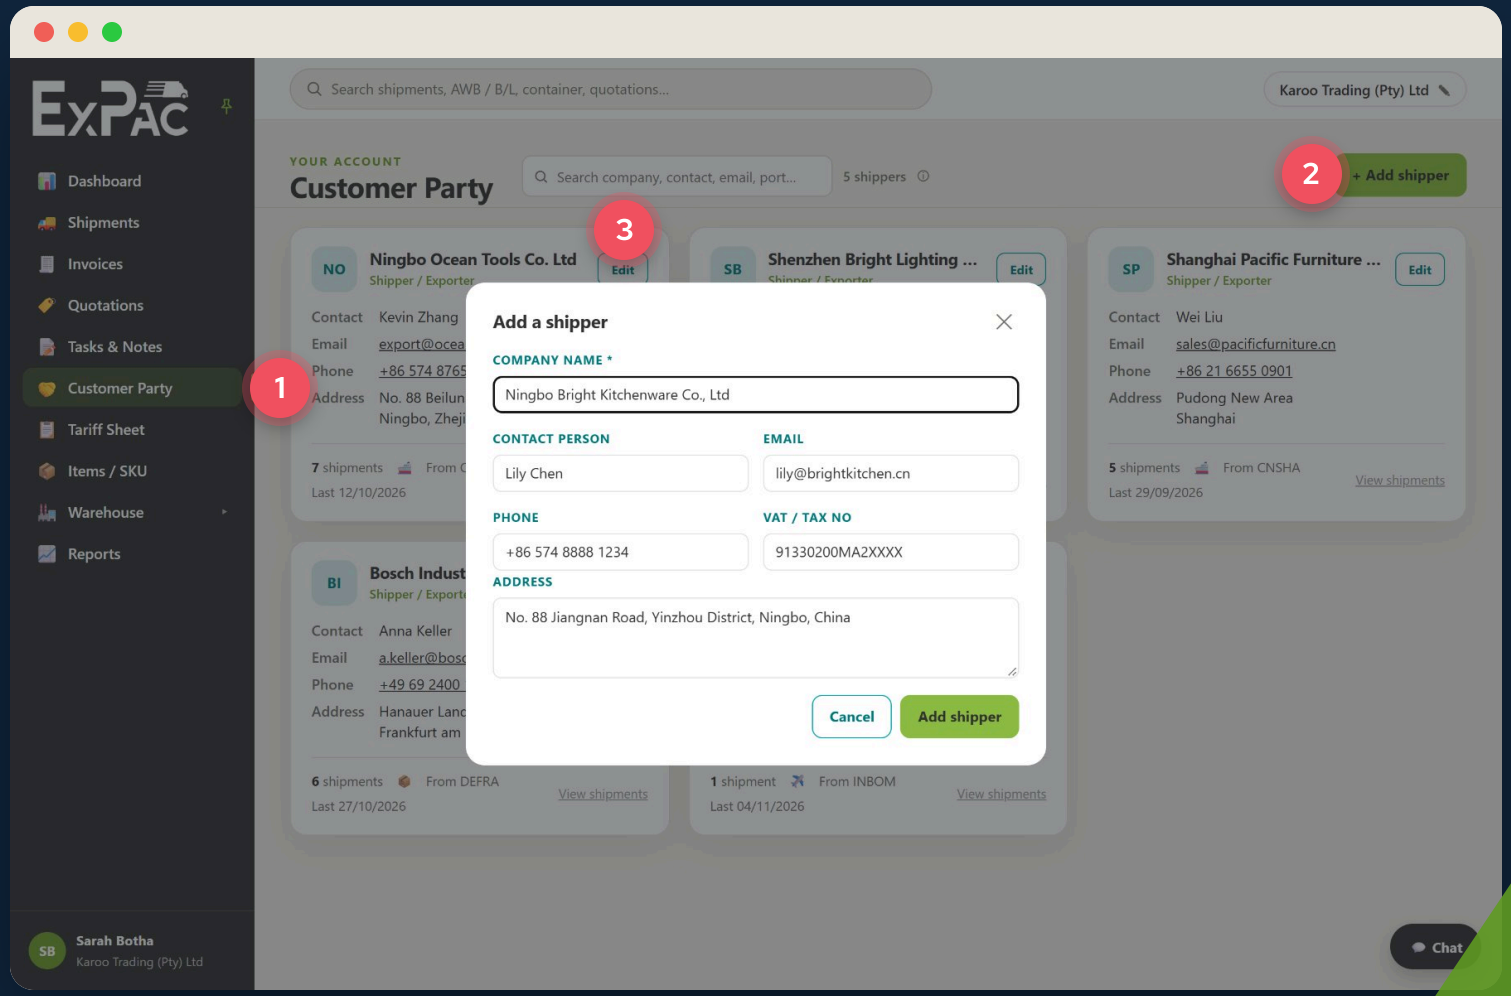

2 **+ Add shipper**

Company name, contact person, email, phone, VAT / tax number and address, then **Add shipper**.

3 **Keep it current**

Edit on a card to update details; **View shipments** lists everything from that supplier.

Why it helps: we use these details on your quotations, bookings and documents, so collections go to the right place first time.

7 · TRACK & TRACE

Follow every shipment

1 **Shipments**

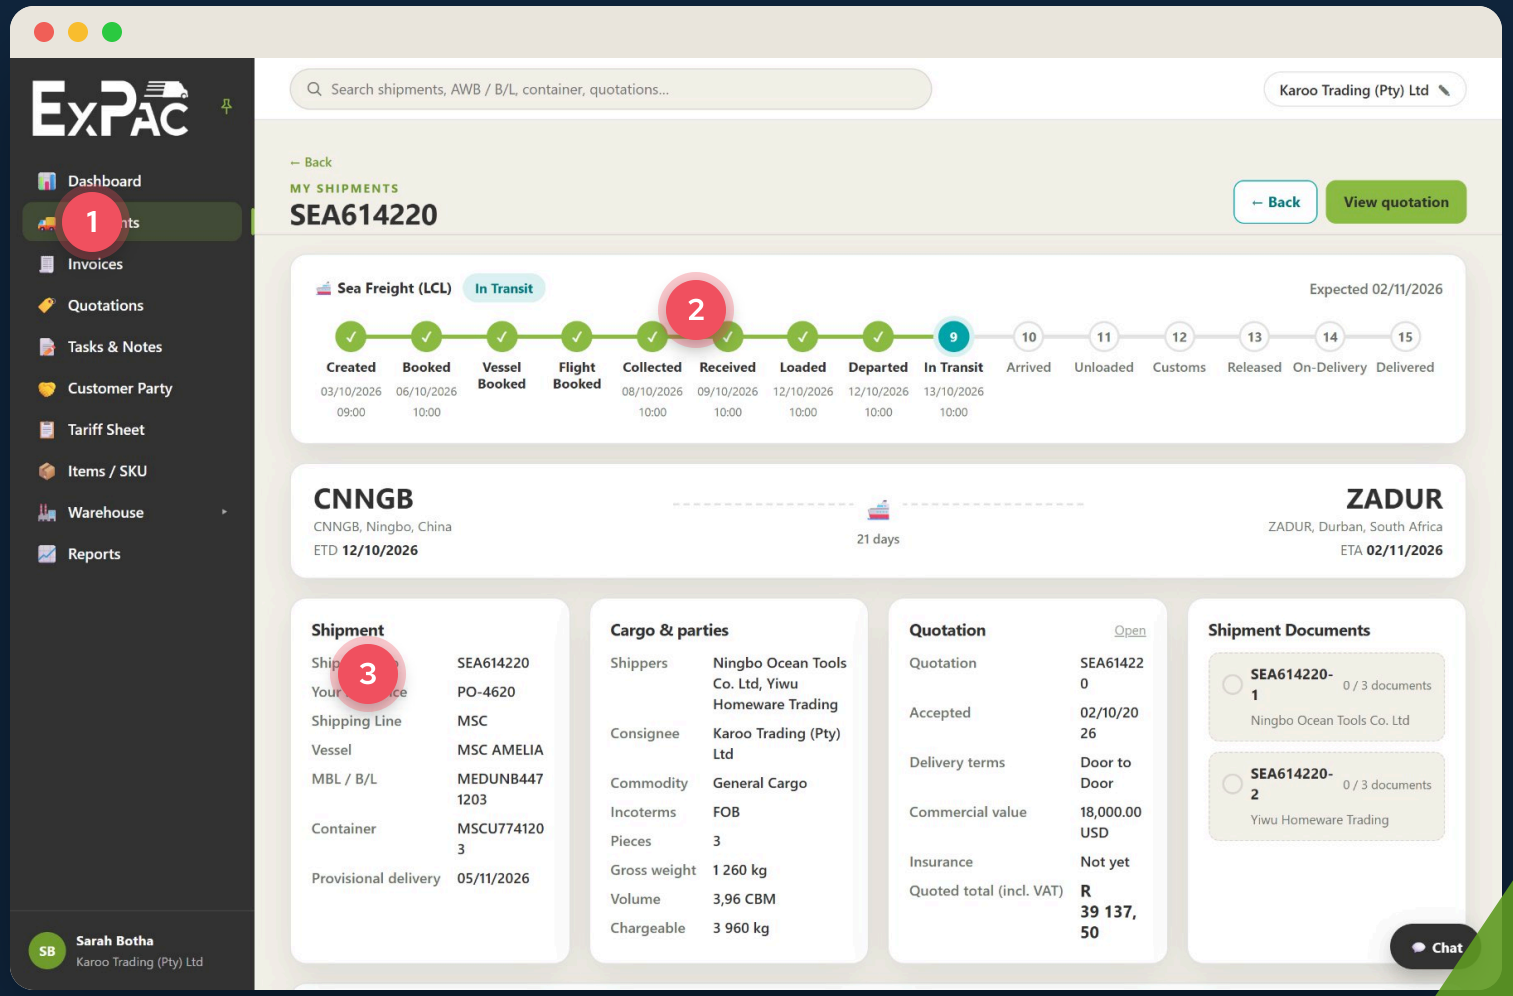

All your active shipments; filter by mode or status, or search any AWB, B/L, container or PO.

2 **The timeline**

Open one: every step from Created to Delivered, each dated as it happens.

3 **All the details**

Vessel or flight, ports, ETD / ETA, delivery date, cargo and the quotation behind it.

7 · TRACK & TRACE

Live tracking, online and by email

1 **Live map**

The route, the ship's position and each port on the way.

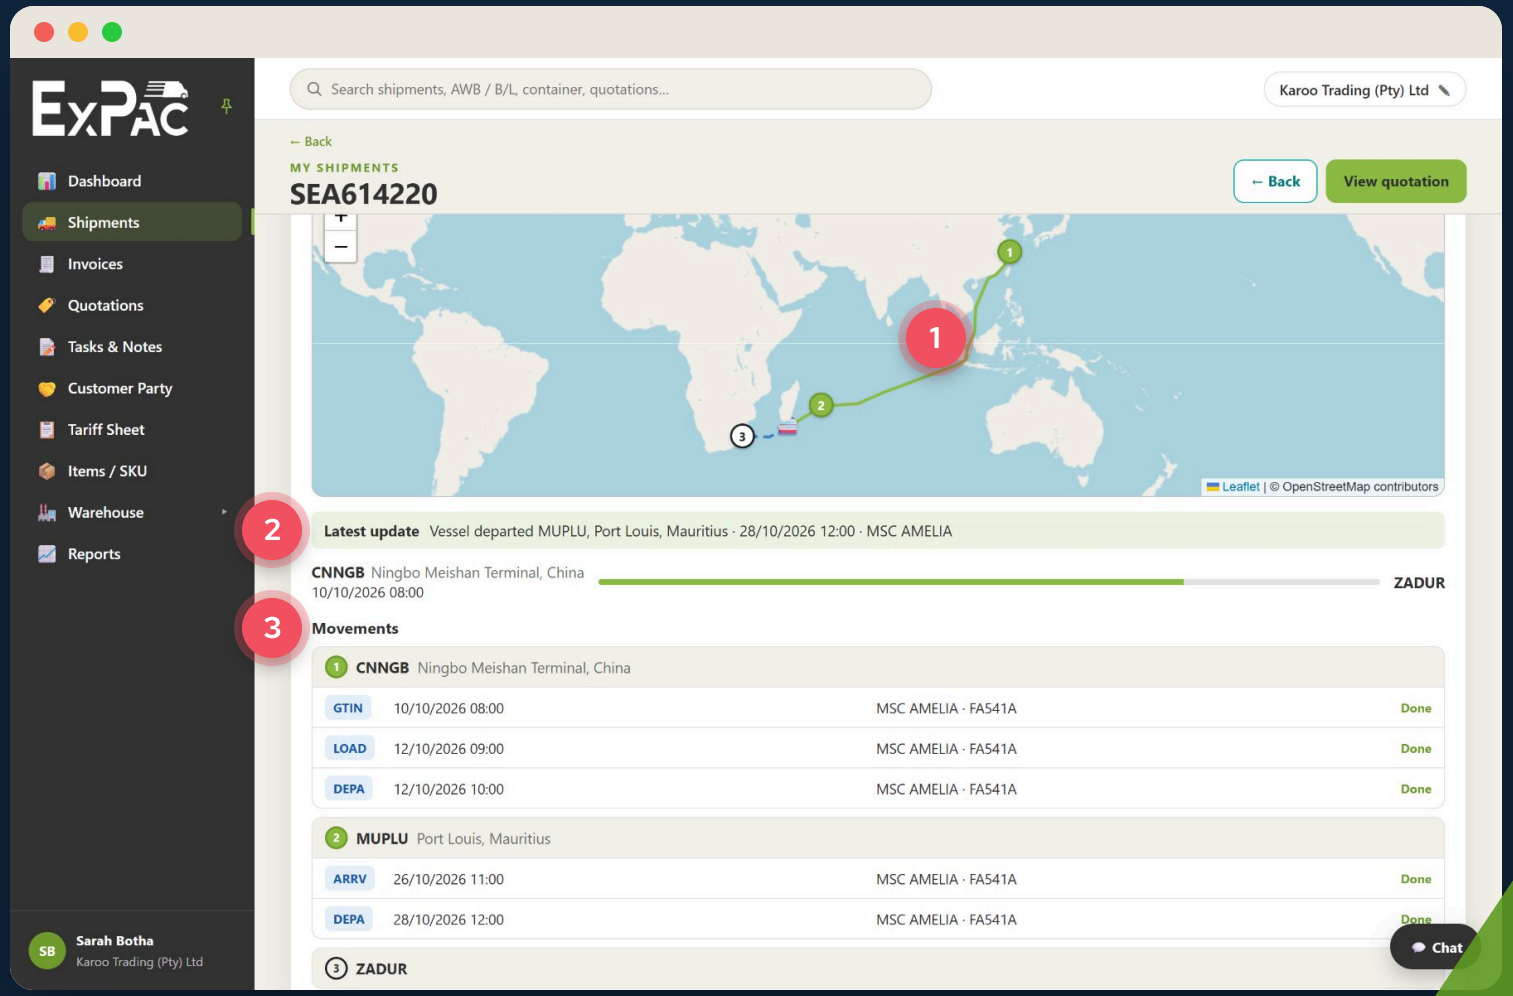

2 **Latest update**

The most recent carrier event, with date and vessel.

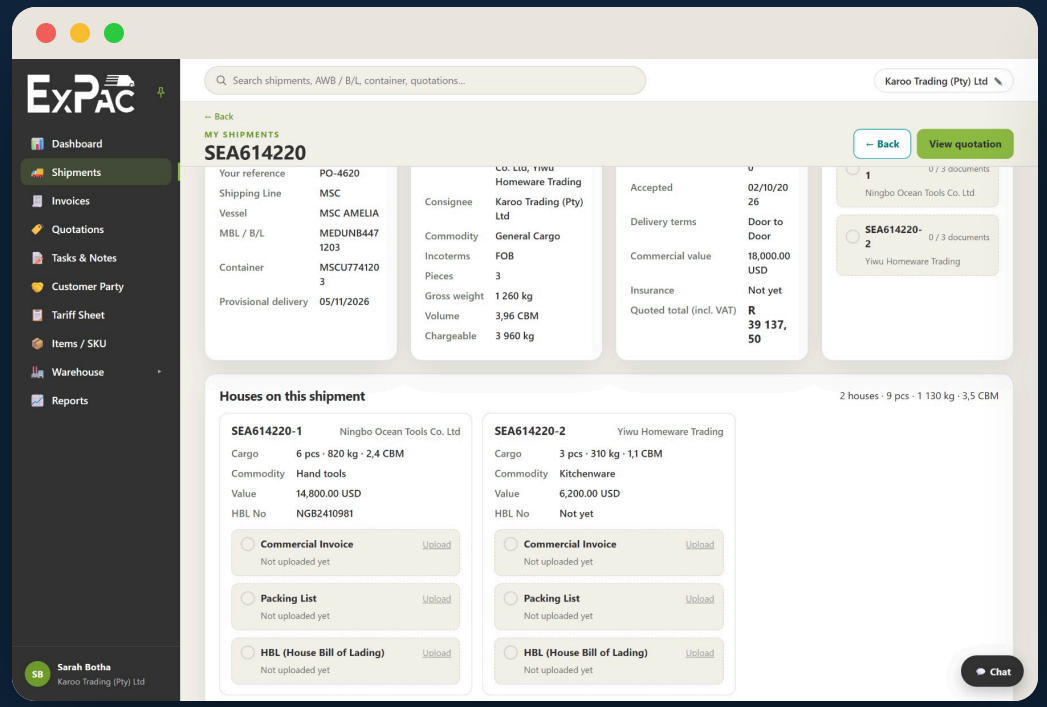

3 **Every movement**

Loaded, departed, arrived, discharged: confirmed or planned.

On the move? Our shipment update emails include a **Live Tracking** button that opens this view, no login needed. Reply to the email and it reaches our team on that shipment.

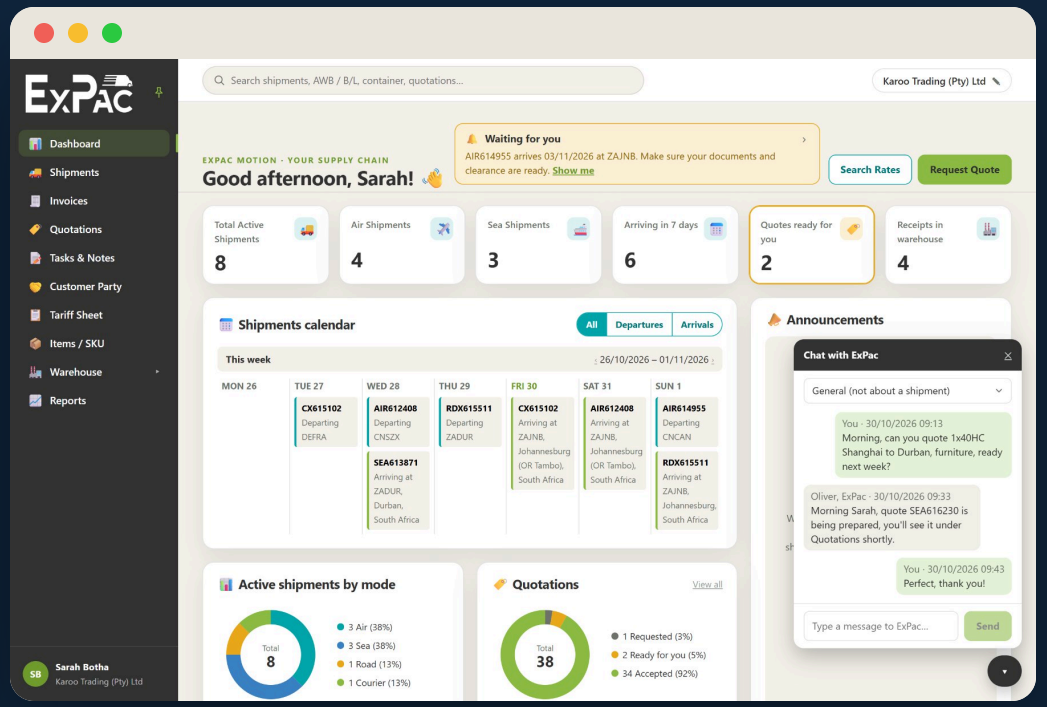

Documents and a direct line to our team

1 Shipment documents

Download ours (invoices, bills, delivery notes) and upload yours (commercial invoice, packing list) on the shipment.

2 Chat with ExPac

The **Chat** button, bottom right of every page: a general question or one about a shipment.

QUICK ANSWERS

Good to know

How long does a quote take?

Our team prices requests during business hours. You're emailed as soon as it's ready.

Full container (FCL)?

Cargo lines are optional: put the container sizes in the notes, e.g. 2 × 40HC.

Where's my accepted quote?

Under Shipments, with the same number. Its timeline starts at Booked.

Can colleagues use it too?

Yes, ask us for a login per person; each sees your company's quotes and shipments.

I'm not sure of the Incoterm or mode.

Choose "Not sure" or the closest mode and say so in the notes; we'll advise the best option.

Can I change a quote after sending it?

Yes: once it's priced, use Request a revision. Before that, message us on Chat.

Does the portal work on my phone?

Yes, in any phone browser. The menu folds away and everything stacks.

What do the dates on tracking mean?

Ticked steps are confirmed with their date; "Expected" dates are the current plan and update as the shipment moves.

Thank you!

Let's get your shipments moving.

Questions, a portal login for a colleague, or a walk-through with your own shipments: we're a message away.
